TEMPERATURE

Thermocouple $\alpha_{AB} = \left(\dfrac{\partial(emf)}{\partial T}\right)_{open\ circuit}$

Thermocouple laws

1. Emf of Thermocouple with junction at T1 and T2 unaffected by temperature elsewhere in circuit
2. Third homogenous inserted in either wires does not affect emf if new junctions are isothermal
3. LAW OF INTERMEDIATE MATERIALS: Metal is inserted between junctions, influence is absent if new junctions are isothermal
4. Thermal emf of metals A, C is E_{AC} is E_{BC} then emf for AB is $E_{AC} + E_{CB}$
5. Thermal emf with junctions at T_1 and T_2 is E_1 and with T_2 and T_3 is E_2 then for Junctions at T_1, T_2 Emf = $E_1 + E_2$
